Congratulations on purchasing the very latest in upholstery cleaning technology.

The patented DriMaster III HiFlo Stainless Steel Upholstery Tool, shown in Figure 1-1, is perfect for cleaning upholstery, fabric and stairs. It has no trigger valve and never needs a separate dry pass.*

The tool’s new design incorporates light weight, extremely durable materials, giving the tool increased levels of strength and comfort.

The DriMaster III HiFlo Stainless Steel Upholstery Tool accommodates high volume jobs where production rate is important.

It is capable of solution flow rates for jobs that require a flushing action which makes the tool particularly efficient for stair cleaning.

An optional accessory handle, shown attached to the tool in Figure 1-2, is available to increase comfort on long cleaning jobs.

We trust that you will enjoy many years of reliable upholstery cleaning with the DriMaster III HiFlo Stainless Steel Upholstery Tool.

The DriMaster III HiFlo Stainless Steel Upholstery Tool can be used with a variety of HydraMaster cleaning systems.

* U.S. Patent No. RE41,367; 7,070,662; RE39,623; D590,111
CONTACT INFORMATION
If you have any questions regarding the operation, maintenance or repair of this tool, please contact your local distributor.

To find a local distributor, please visit our website at http://hydramaster.com/HowToBuy/DealerLocator.aspx.

If your question cannot be resolved by your distributor or by the information within this manual, you may contact HydraMaster direct using the following phone numbers.

WARNINGS, CAUTIONS AND NOTICES

**WARNING**

HydraMaster uses this WARNING symbol throughout the manual to warn of possible injury or death.

**CAUTION**

This CAUTION symbol is used to warn of possible equipment damage.

**NOTICE**

This NOTICE symbol indicates that federal or state regulatory laws may apply, and also emphasizes supplemental information.
This page intentionally left blank.
2 - Operating Instructions

Your DriMaster III HiFlo Stainless Steel Upholstery Cleaning Tool has been engineered using the latest and most sophisticated technology available to produce the finest upholstery cleaning results possible. Despite this, it remains only a tool of the upholstery cleaning trade and can produce only as a good a job as the person operating it.

HydraMaster strongly recommends attending an Institute of Inspection, Cleaning and Restoration Certification (IICRC) approved Upholstery Cleaning course as soon as possible and to always follow the IICRC guidelines when cleaning.
OPTIONAL ACCESSORY HANDLE ASSEMBLY (P/N 000-061-144)
The DriMaster III HiFlo Stainless Steel tool can be equipped with an optional accessory handle (purchased separately) to increase comfort and control during difficult or extended repetitious use of the upholstery tool.

1. Attach the left and right handles (items 3 and 4 - see Figure 2-1) to the DM III.

2. The shorter screws, nuts, and washers (items 2, 5 and 6) are used on the upper handle.

3. The longer screws, nuts and washers (items 1, 5 and 6) are used to connect the assembled handle to the tool body.

Figure 2-1. Attach Optional Accessory Handle to the DM III
BEGIN CLEANING

**WARNING**

Do not use the DriMaster III on a machine exceeding 14” Hg vacuum and 500 psi solution pressure. Personal injury could result.

1. Attach the solution hose to the solution quick connect. A 1 ½” - 2” vacuum hose can be attached to the vacuum hose manifold (see Figure 2-2).

2. Adjust the solution volume by turning the solution control knob. Turning the knob counterclockwise increases the solution volume; turning the knob clockwise decreases the solution volume. The amount of solution volume you need will vary with the type of machine you are cleaning with and the type of material you are cleaning.

3. To begin adjustment, make sure the cleaning machine is running and both vacuum and solution hoses are connected.

4. Slowly open the solution control knob until solution is flowing across the entire bar jet (without overspray).
When the solution knob is turned toward the "HiFlo" position, the solution will form a liquid "sheet" across the bar jet (see Figure 2-3)

![Image of solution knob turned to "HiFlo" position]

**Figure 2-3. Turning Knob to “HiFlo” Position**  
Forms Sheet of Solution Across Bar Jet

**NOTICE**

The amount of vacuum and pressure produced by your machine will determine the overspray on the bar jet assembly.

**WARNING**

Do not touch the bar jet assembly during operation or immediately afterward; doing so may cause severe burns.

**CAUTION**

When cleaning stairs, do not allow the tool to come into contact with the tack strip along the edges of the stairs. The tool’s cleaning surface may be damaged by the tack strip. Equipment damage such as this is not covered by warranty.
3 - Tool Maintenance

CLEANING BAR JET ASSEMBLY
The bar jet assembly needs to be cleaned with a 0.015" feeler gauge.

1. Slide the feeler gauge into the small slot (see Figure 3-1).
2. Gently slide the gauge back and forth to clear any debris from the opening.

**CAUTION**

Use only a feeler gauge to clean the slot in the bar jet. Use of any other implement (paper clip, knife blade) may damage the opening and seriously reduce the cleaning effectiveness of the upholstery tool.

**NOTICE**

HydraMaster recommends you clean the filter cartridge and orifice plate on a periodic basis to eliminate hard water deposit buildup. Both components are conveniently located in the Hide-a-Hose solution quick connect (see Figure 3-2).

See page 3-4 for additional cleaning information.
CLEANING THE FILTER CARTRIDGE AND ORIFICE PLATE

1. Disassemble the Hide-a-Hose quick connect to gain access to the filter cartridge and orifice plate (see Figure 3-2 and Figure 3-3).

2. Remove the filter cartridge and orifice plate, place them in a cup full of white vinegar and soak for 30 minutes.

Figure 3-2. Disassemble Quick Connect

Figure 3-3. Remove Filter Cartridge and Orifice Plate
3. Clean the orifice plate’s opening with a wooden skewer or a similar tool such as a plastic pick.

**CAUTION**

Do not use a metal object to clean the opening of the orifice plate; doing so can damage the plate.

4. Remove both parts from the vinegar and thoroughly rinse them with clean water.
5. Re-assemble the solution quick connect, re-installing the filter cartridge and orifice plate in the proper order (see Figure 3-3).

**CAUTION**

Do not operate the DriMaster III without the orifice plate installed. If you do not properly re-install the orifice plate in the solution quick connect as indicated in Figure 3-3, equipment damage could result. Such equipment damage is not covered by warranty.
It may be necessary to periodically clean the inside of the tool, hose and manifold. Debris can build up over time, restricting the air flow.

Follow this procedure to disassemble the tool and clean the interior:

1. Remove the nose of the tool by first removing the four 4-40 screws using an Allen head wrench (see circled screws in Figure 3-4).

2. Clear any debris build up from the interior of the tool.
3. Re-install the nose, carefully ensuring that the bar jet assembly enters the space between each mounting groove inside the end of the nose (see Figure 3-5).

---

**Figure 3-4. Remove Four 4-40 Screws (Circled) from Nose of Tool**

**Figure 3-5. Re-install Nose**
4. Carefully fit the nose to the end of the tool body while aligning the mounting flange over the top and bottom halves of the tool.
5. After the nose is seated, install the four 4-40 mounting screws using the thread locker indicated in Figure 4-2.

**NOTICE**

The material of the nose can slowly wear down over time, due to regular use; this is typical and is not considered a warranty issue.

HydraMaster recommends that the operator/distributor stock replacement parts in the service vehicles.
This section of the manual shows the DM III assembly illustrations.

Some of the illustrations in this section reference sealants, thread lockers, adhesive, primer, anti-seize and lubricant specifications that are used in the construction of HydraMaster equipment.

Refer to Figure 4-1 to identify those substances such as A1, A2 and so forth. Equivalent products are acceptable if they meet or exceed current specifications and are approved by HydraMaster.

5 - How to Order Parts

From time to time, cleaning equipment may wear out or malfunction. To obtain a proper
diagnosis of your malfunction, and to order warranty replacement parts or arrange for
repairs, it is important that you proceed in the following manner:

WARRANTY PARTS ORDERS
1. Call the local distributor where you purchased your equipment and ask for the
   Service Department.
2. Have the following information ready:
   a. Equipment Model
   b. Date of Purchase
   c. Description of Malfunction
3. Once it has been determined which parts are needed to correct the problem with
   your tool, make arrangements with your distributor to either perform the repairs or
   ship the parts to you.

PARTS ORDERS
Call your local distributor. In most instances, they either stock or have access to parts
through a regional service center.

EMERGENCIES
If, for any reason, your distributor is unable to supply you with the necessary parts, they
may call us and arrange for expedited shipping.

HydraMaster sells parts only through authorized distributors and service centers.

We shall always endeavor to be fair in our evaluation of your warranty claim, and shall
provide you with a complete analysis of our findings.
This page intentionally left blank.
6 - Warranty Information

All parts of the Upholstery Tool are warranted against defects as stated in the Golden Guarantee® Limited Warranty document which is shipped to you with this Owner’s Manual. Refer to HydraMaster’s website at:
http://hydramaster.com/KnowledgeCenter/Warranty.aspx

Warranty coverage is available to you through your local distributor.

HydraMaster warranty covers only defective materials and/or workmanship for the period listed. Labor and/or diagnostic reimbursement is specifically excluded.

If you have moved to a new area or have purchased a used machine and need information regarding your local distributor, call HydraMaster at (425) 775-7272 or email us at: custsvc@hydramaster.com.
This page intentionally left blank.
GOLDEN GUARANTEE® LIMITED WARRANTY PLAN

HydraMaster machine owners enjoy the most comprehensive warranty protection available in the truckmount industry. All components, large or small are included in the Warranty Plan, providing the owner with real warranty coverage against any part failure, large or small. Our machines are designed with a richness of detail and with many labor-saving features. The elegant simplicity of our design will always outperform more complicated equipment in the long haul. While HydraMaster equipment is extremely reliable and we endeavor to use only top quality components, if a malfunction should occur you’ll see why they call HydraMaster “Customer Friendly”. We look forward to having you as a member of HydraMaster’s family of satisfied machine owners.

HydraMaster warrants truckmount machines of its manufacture to be free from defects in material and workmanship if properly installed, maintained, and operated under normal conditions with competent supervision. No person, agent, representative or dealer is authorized to give any warranties on behalf of HydraMaster nor to assume for HydraMaster any other liability in connection with any HydraMaster products. This warranty shall extend to the original purchaser of said equipment for the periods listed below from date of installation. This warranty is non-transferrable. To ensure the functionality and safety of this equipment, if repairs, replacements or modifications are made by the Purchaser without HydraMaster’s consent, HydraMaster’s warranty shall cease to be in effect.

HydraMaster agrees, at its option, to repair at the point of installation, or to replace without charge any parts or parts of machinery, equipment and accessories furnished by HydraMaster, but manufactured by others, are warranted only to the extent of the original manufacturer's warranty to HydraMaster unless otherwise specified in the listing below.

HydraMaster, but manufactured by others, are warranted only to the extent of the original manufacturer's warranty to HydraMaster unless otherwise specified in the listing below.

Machinery, equipment and accessories furnished by HydraMaster, but manufactured by others, are warranted only to the extent of the original manufacturer's warranty to HydraMaster unless otherwise specified in the listing below.

HydraMaster agrees, at its option, to repair at the point of shipment, or to replace without charge any parts or parts of products of HydraMaster's manufacture, which within the specified warranty period shall be proved to HydraMaster's satisfaction to have been defective when shipped, provided the purchaser promptly notifies HydraMaster, in writing, of such alleged defect. HydraMaster will pay all freight and transportation charges within the United States, via normal ground shipping means, for replacement of parts covered under this warranty.

This warranty covers parts, as specified, and labor which may be necessary in completing repairs. HydraMaster's liability to Purchaser, whether in contract or in tort arising out of warranties, representation, instructions, or defects from any cause shall be limited to repairing or replacing the defective part or parts using new or remanufactured parts. To qualify for warranty coverage, defective parts must be returned to HydraMaster within 60 days under an assigned RMA. No liability whatsoever shall attach to HydraMaster until said products have been paid for.

Except as stated in this section and in the proceeding section and except as to title, there are no guarantees or warranties of merchantability, fitness, performance or otherwise, express, implied or statutory, and HydraMaster shall have no liability for consequential, incidental, or other damages, howsoever caused, including but not limited to lost business, downtime, lodging. Parts supplied under this warranty will themselves be warranted only for the remaining time left in the original warranty period.

All components not specifically referenced in the schedule below are covered under this warranty for a period of two (2) years, excepting those parts which are considered, by HydraMaster, to be expendable in normal use, including but not limited to paint, labels and other cosmetic parts or features.

Freezing of any water or chemical related component will VOID all warranties on water or chemical related components, internal or external, of this equipment.

Corrosion, deposits and/or build-up in the water, chemical, recovery or heating systems due to hardness in the water used or chemicals which results in deposits, will VOID all warranties on affected components.

The use or application of any chemical, including but not limited to acids or solvents, which results in damage to metal, rubber, plastic, or painted parts will VOID all warranties on those parts.

---

**FRAME, COVER ASSEMBLIES:**
- VACUUM RECOVERY TANK (Structural):
  - ENGINE:
    - VACUUM BLOWER: (Uncontested Through Tuthill)
  - CHEMICAL SYSTEMS:
    - INTERNAL MACHINE HOSES:
    - HIGH PRESSURE BY-PASS VALVE:
    - EXTERNAL MACHINE HOSES:
  - BELTS, FITTINGS, FILTER SCREENS, GAUGES:
  - WATER HEATING SYSTEM:
    - WATER PRESSURE PUMP: (Through original Manufacturer)
  - ELECTRICAL COMPONENTS:

**Warranty Periods:**
- VACUUM RECOVERY TANK: 3 years
- ENGINE: 3 years
- VACUUM BLOWER: 2 years
- CHEMICAL SYSTEMS: 2 years
- INTERNAL MACHINE HOSES: 2 years
- HIGH PRESSURE BY-PASS VALVE: 2 years
- EXTERNAL MACHINE HOSES: 2 years
- BELTS, FITTINGS, FILTER SCREENS, GAUGES: 2 years
- WATER HEATING SYSTEM: 2 years
- WATER PRESSURE PUMP: 2 years
- ELECTRICAL COMPONENTS: 2 years

**ALL MACHINE ACCESSORIES & FRESH WATER TANKS HAVE A 1 YEAR WARRANTY.**
